

This is what I saw in most of the 6
that had the earplug in WRONG!

DEAR

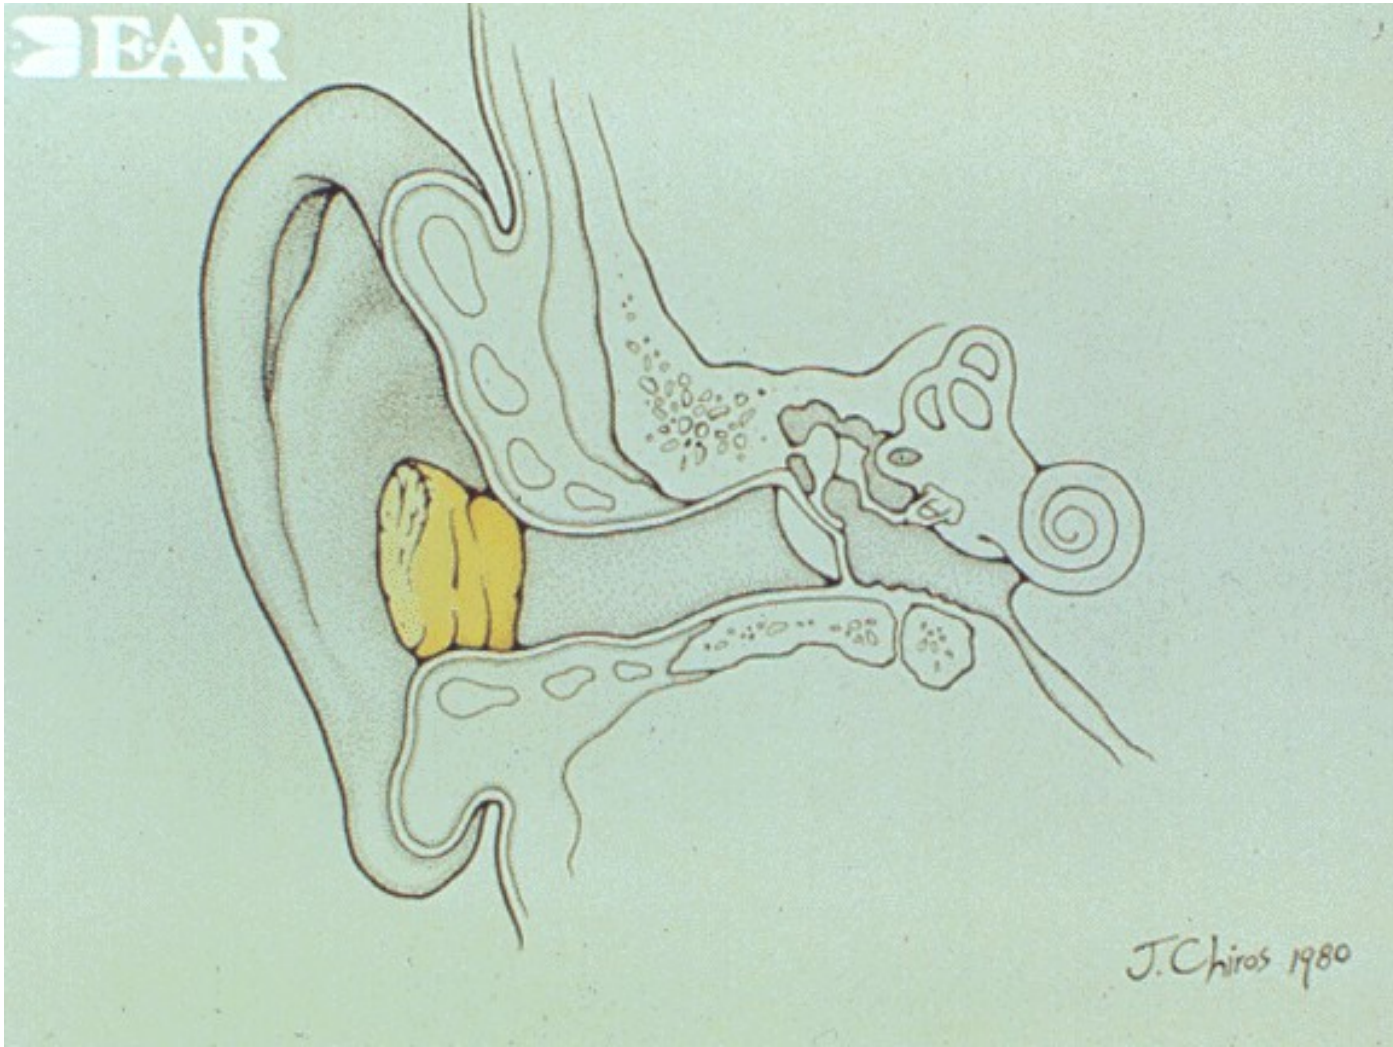

Proper

Improper

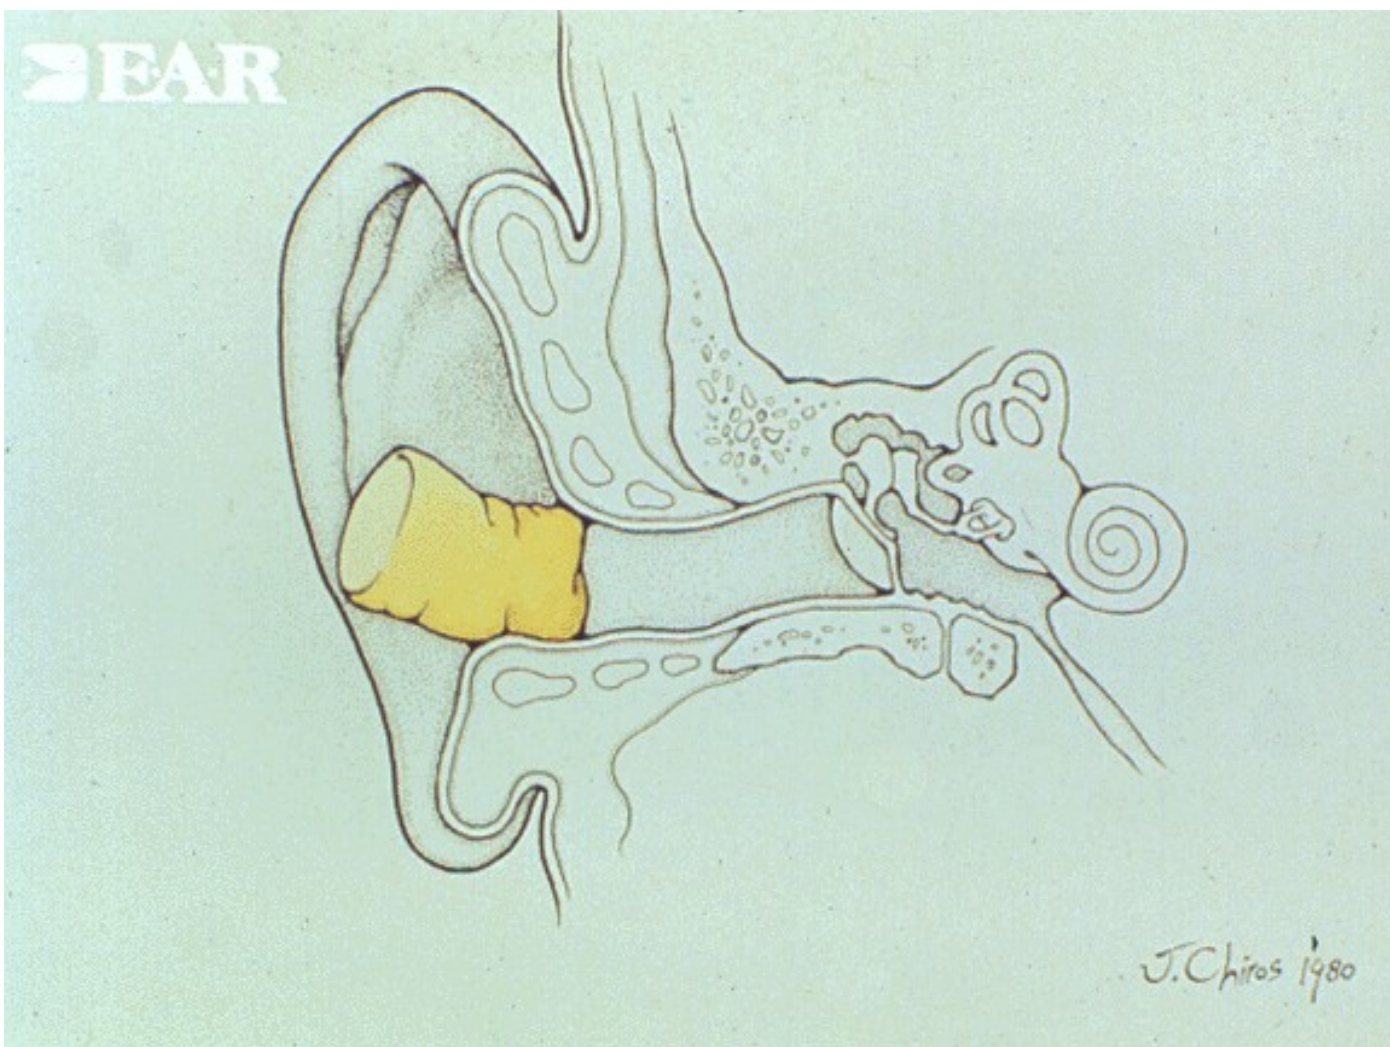

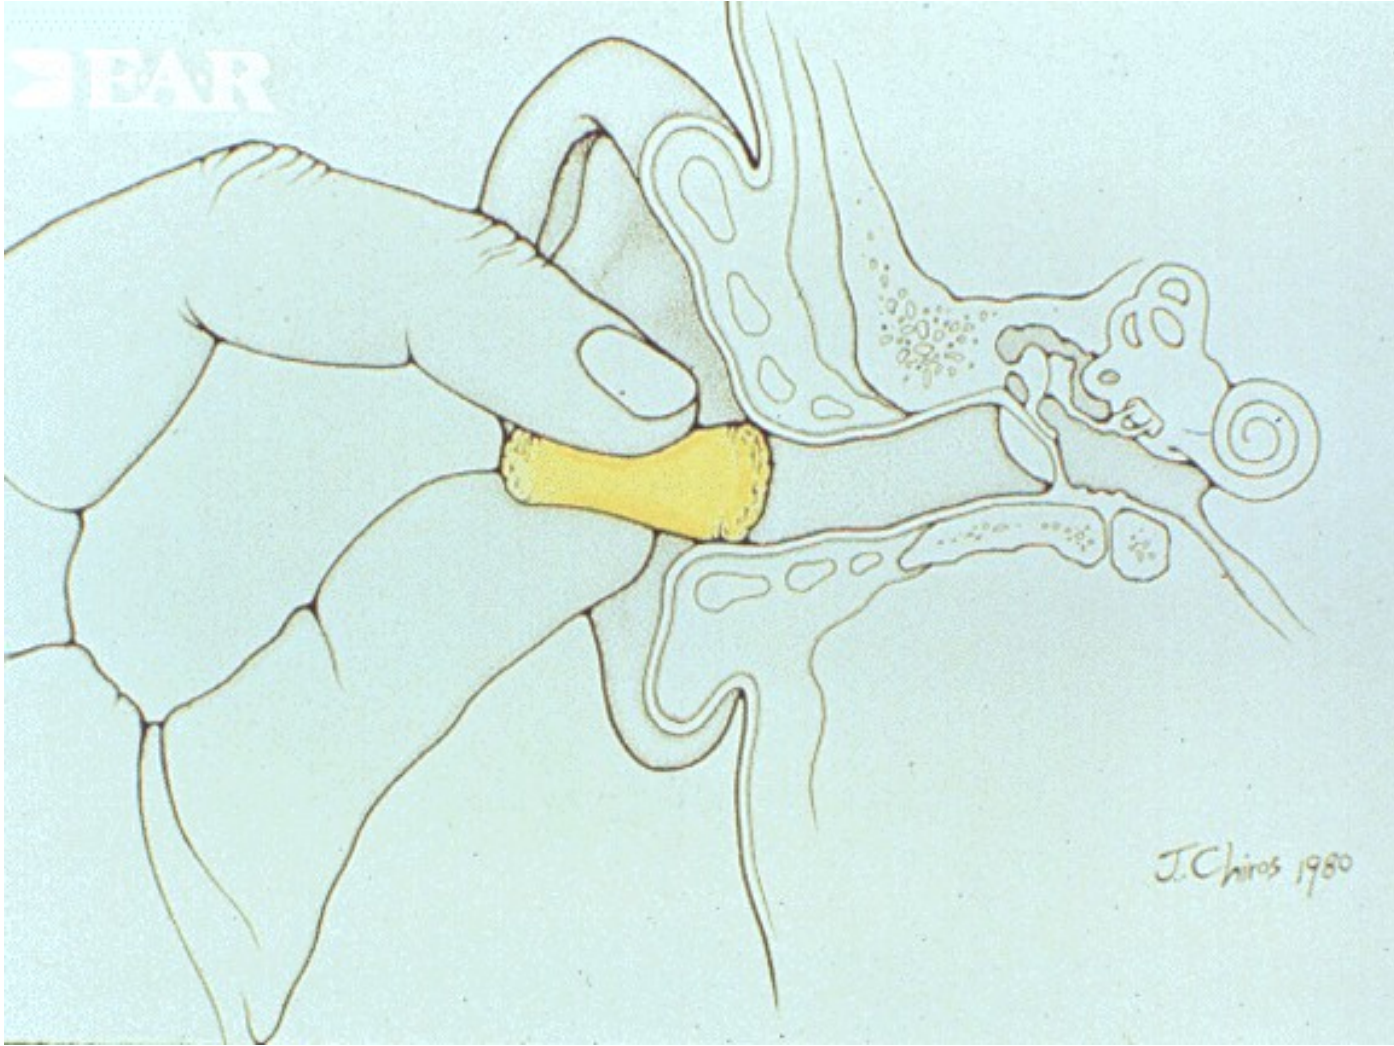

Wrong: Roll it down into a golf T shape, push on the ear with the opposite hand and pull the canal, hold in place for 10 sec to allow expand upward and not outward

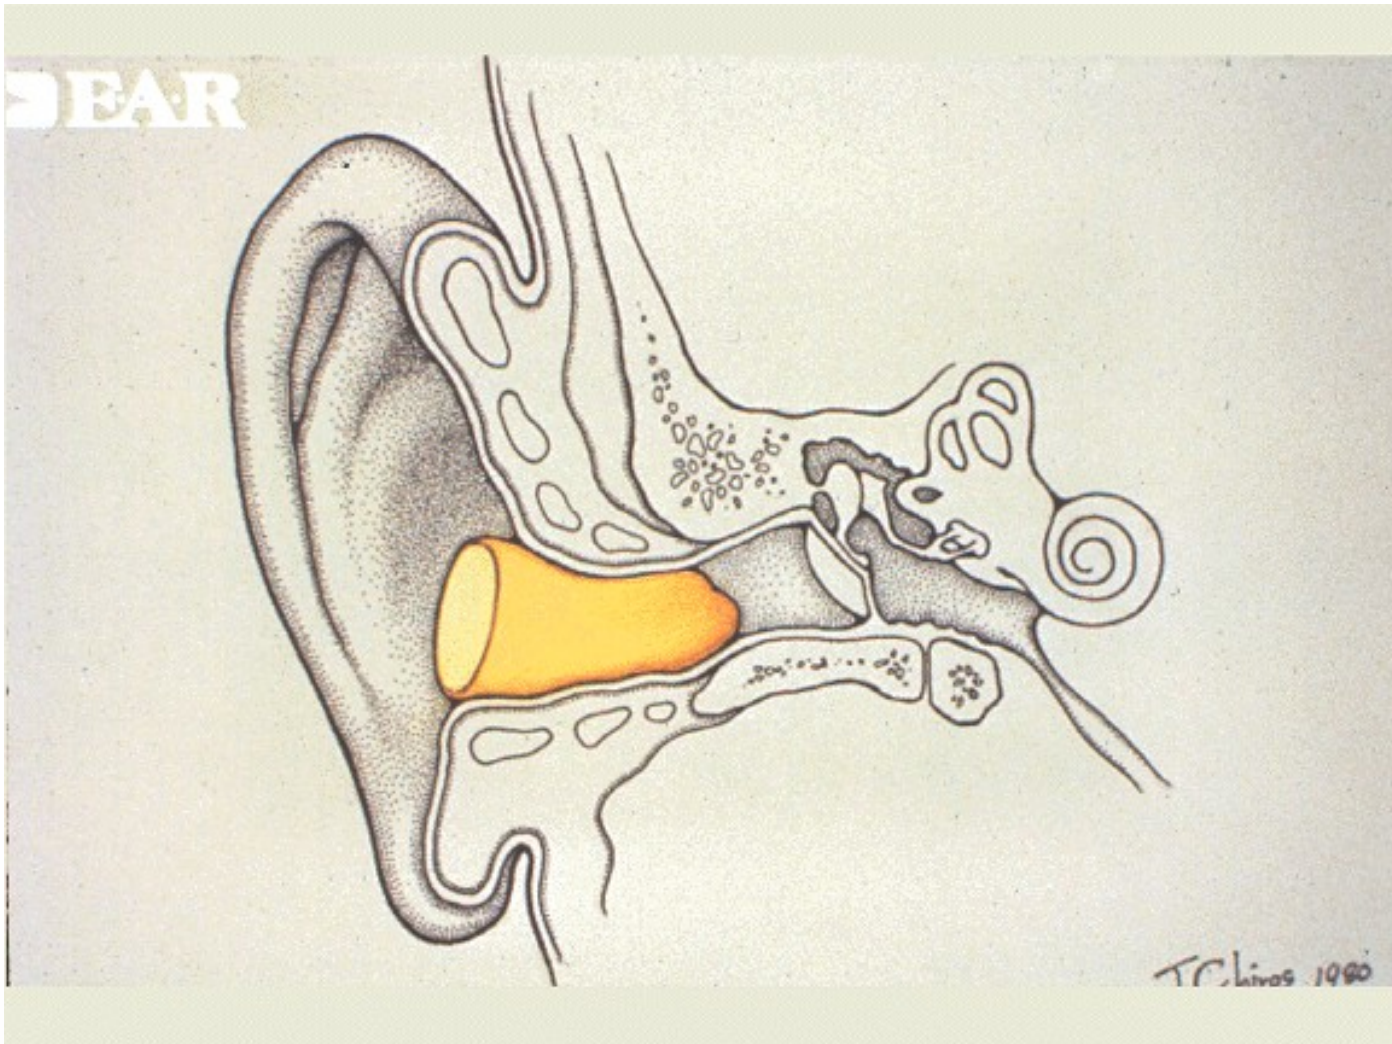

Wrong: Not rolled down first, just pushed without rolling it down and pulling back ear canal to expand canal....

Wrong!

Still wrong. Not rolled down to golf T shape prior to inserting into canal

Excellent Fit. Deep in ear canal. Tight fit all around. Just a little of the ear pl should be showing

Step 1 - Clean fingers

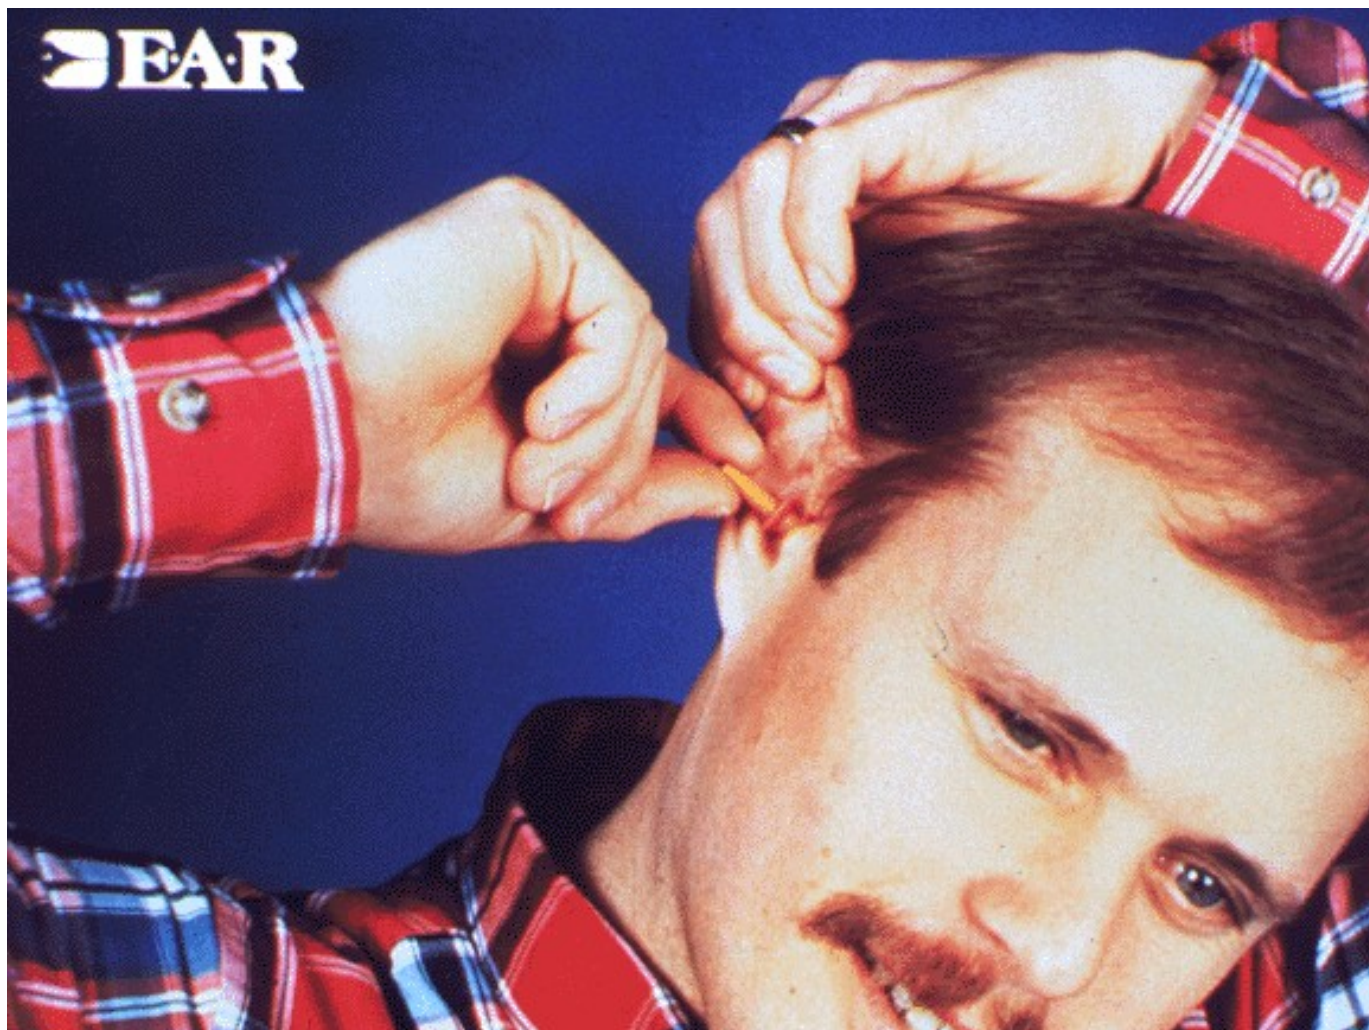

Step 2 - Roll don't squeeze

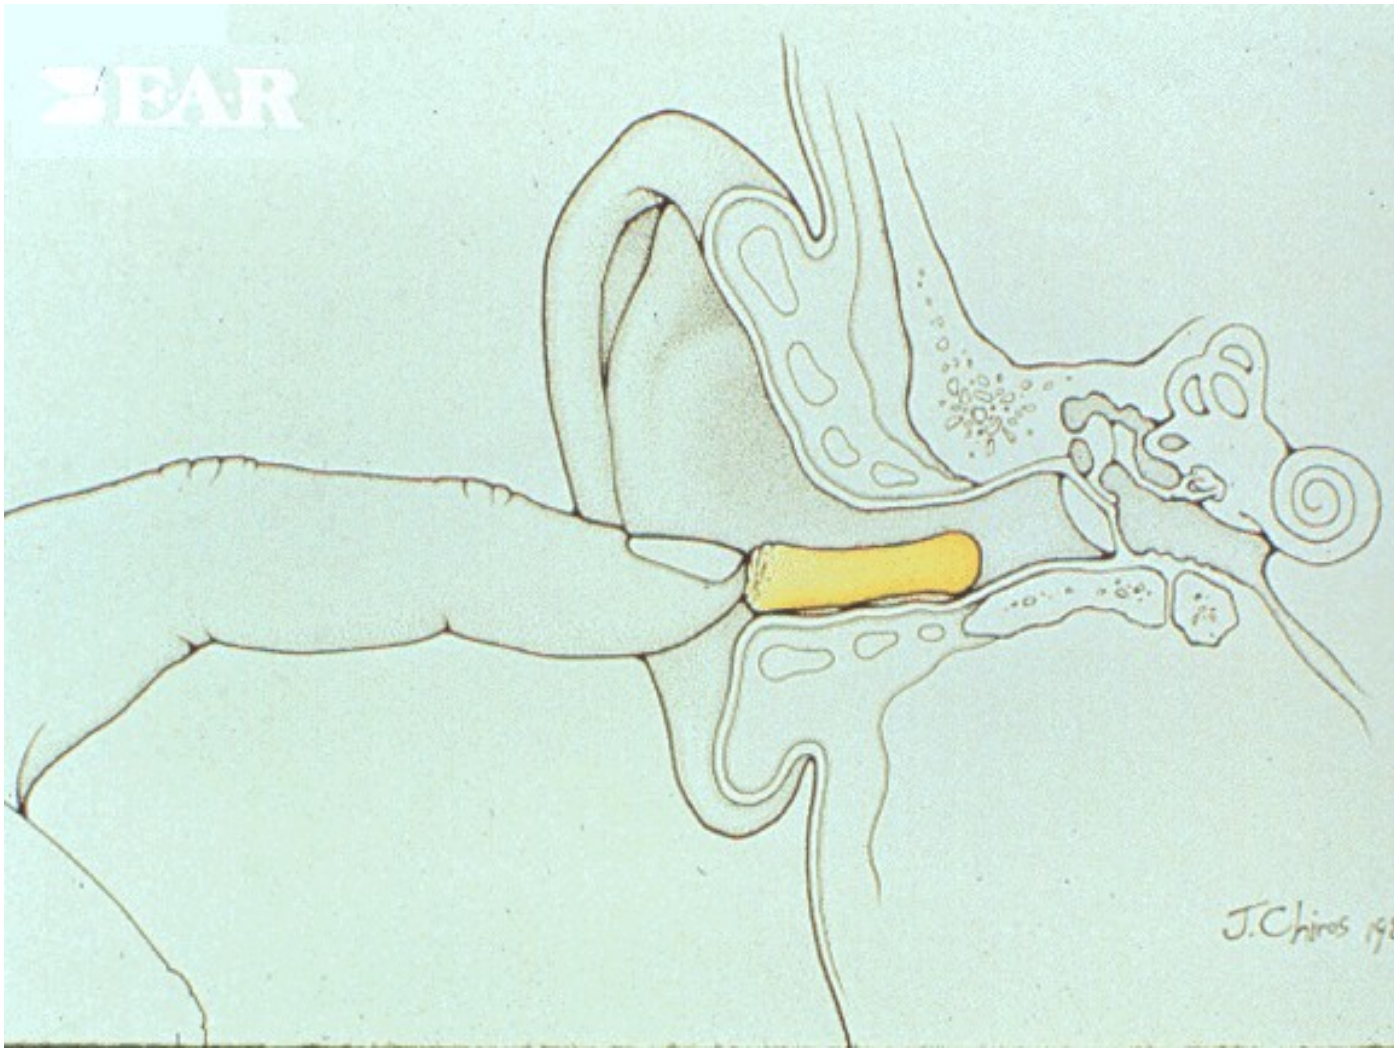

Step 2a Rolled but should have a bit of a golf T shape to one end...

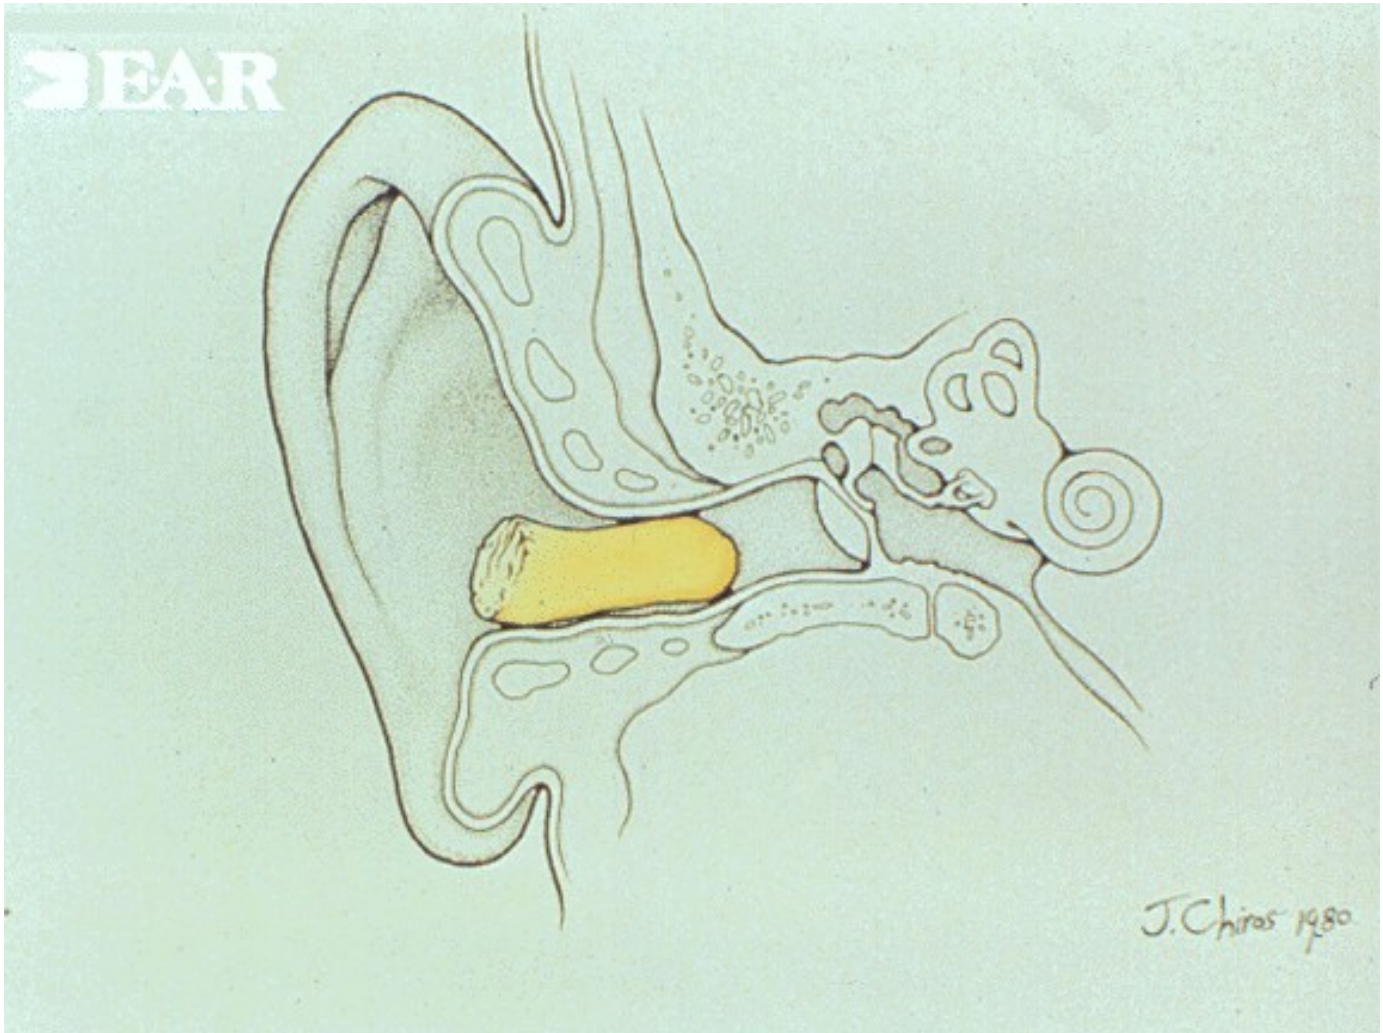

Step 3 prepare to insert

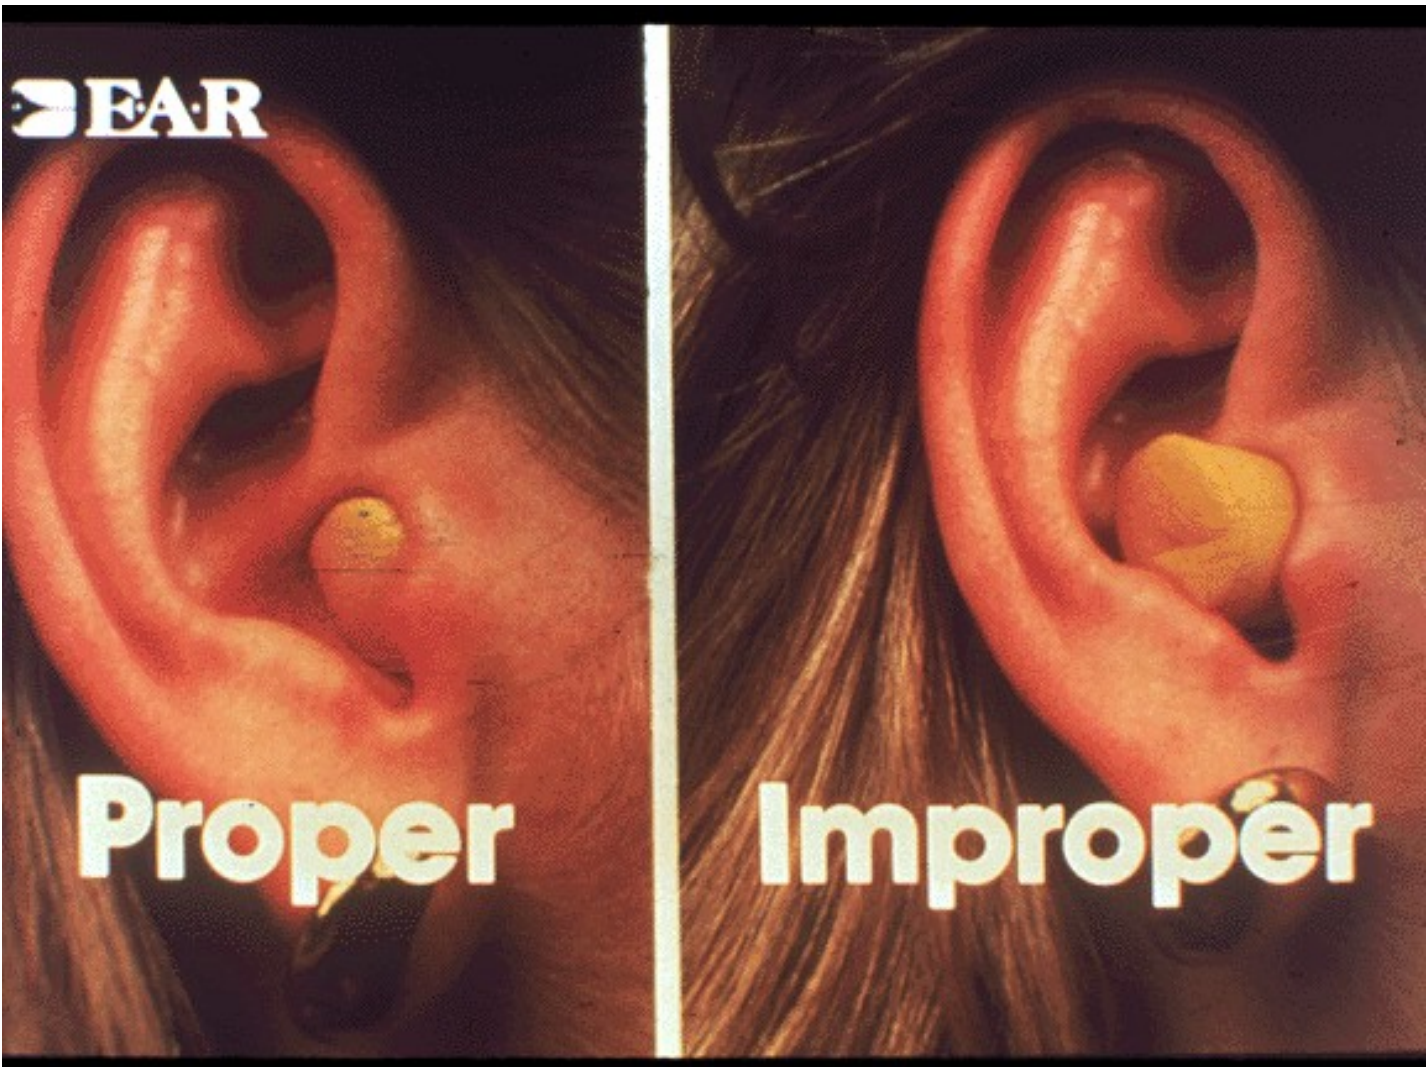

Step 4 - Insert. Pull back on ear. Push in
Rolled earplug

Step 5. Hold in place for at least 10 seconds to allow earplug to expand while deep in canal. Finger block prevents ear plug from expanding outward and forces it to expand.

Good Fit. Deep in ear canal.

Remember. Look for this. Print this out
post it everywhere earplugs are used!

Shape of deep fitted E-A-R after removing appropriately fitted ear plugs
